— Adding a Tab on the Main Page .....	3
---------------------------------------	---

## Adding a Tab on the Main Page

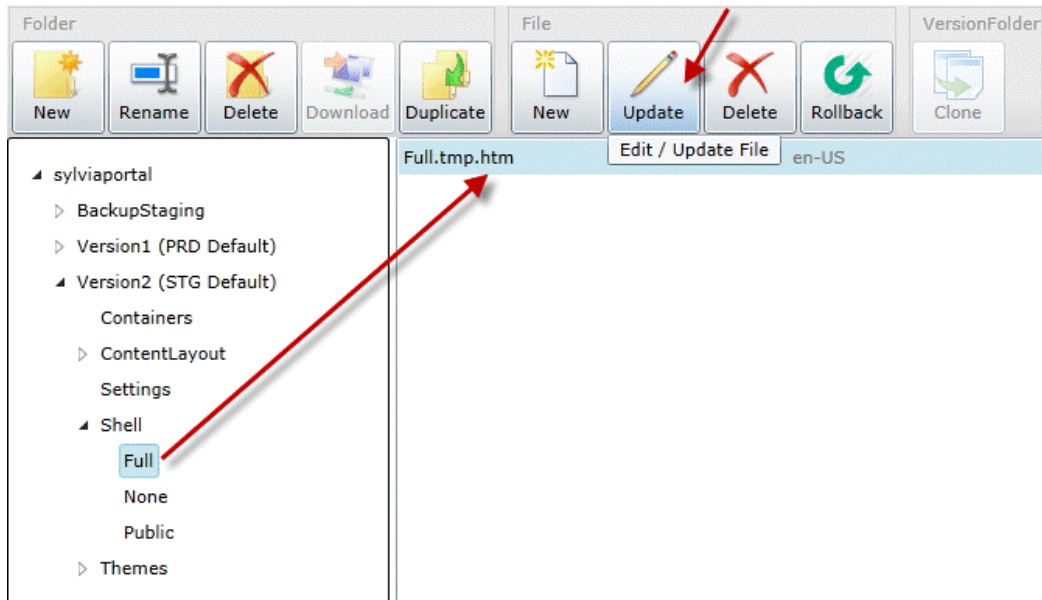

1. Launch your staging URL <http://staging.epower.amadeus.com/YOURPORTAL/#Page=Home>
2. Sign in with your Host Admin Credentials

3. Click on Show Host Admin
4. Click on File Manager

5. Click on the Staging Version to be modified
6. Click on Shell
7. Click on Full
8. Click on Full.tmp.htm
9. Click on Update

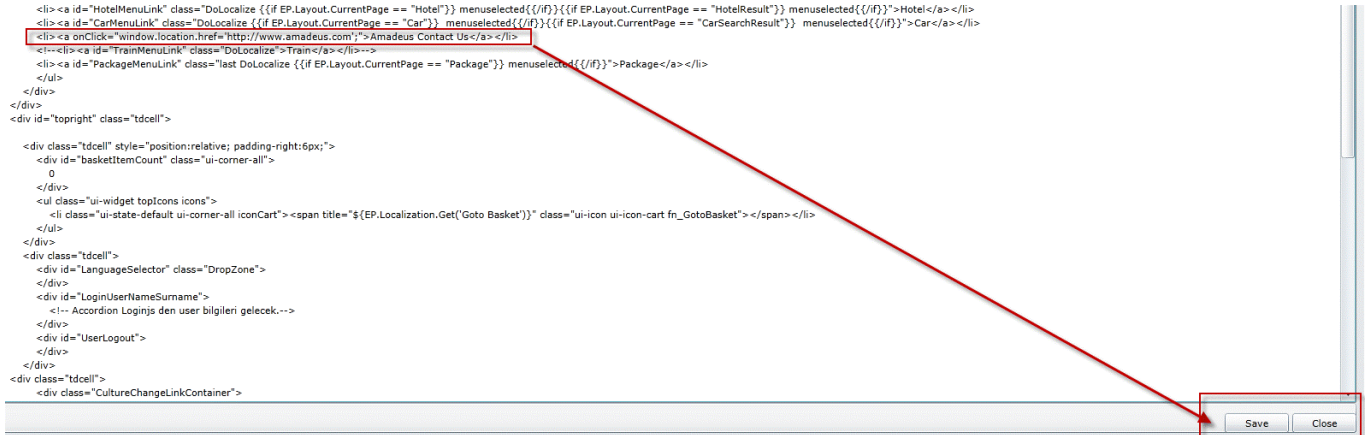

10. Add the list item HTML tag (li) in the order you would like to see it on your website. For example, the list item tag shown below was added between the Car and Package section.

**<li><a onClick="window.location.href='http://www.amadeus.com';">Amadeus Contact Us</a></li>**

```
<ul>
<li><a id="HomeMenuLink" class="DoLocalize {{if EP.Layout.CurrentPage == "Home"}} menuselected{{/if}}">Home</a> </li>
<li><a id="FlightMenuOpenLink" class="DoLocalize" style="cursor:pointer">Flight</a>
  <ul id="FlightMenuSubLinks" style="z-index:100;position:relative;display:none;">
    <li><a id="FlightMenuLink" class="DoLocalize {{if EP.Layout.CurrentPage == "Flight"}} menuselected{{/if}} {{if EP.Layout.CurrentPage == "FlightScheduleMenuLink" class="DoLocalize {{if EP.Layout.CurrentPage == "FlightSchedule"}} menuselected{{/if}} {{if EP.L
    </li>
  </ul>
</li>
<li><a id="HotelMenuLink" class="DoLocalize {{if EP.Layout.CurrentPage == "Hotel"}} menuselected{{/if}} {{if EP.Layout.CurrentPage == "
<li><a id="CarMenuLink" class="DoLocalize {{if EP.Layout.CurrentPage == "Car"}} menuselected{{/if}} {{if EP.Layout.CurrentPage == "Car
<li><a onClick="window.location.href='http://www.amadeus.com';">Amadeus Contact Us</a></li>
<!--<li><a id="TrainMenuLink" class="DoLocalize">Train</a></li-->
<li><a id="PackageMenuLink" class="last DoLocalize {{if EP.Layout.CurrentPage == "Package"}} menuselected{{/if}}">Package</a></li>
</ul>
```

11. Click on Save
12. Click on Close

13. Test your site.
14. Backup and Publish your UI (please review the How to Backup and Publish Your Site instructions.)
